

The sketches are based on measurements taken on the date of inspection. Only the first floors are included.
 When both floors are added together, the actual heated square feet of apartments is about 38,136 sq ft.
 The sketches are not guaranteed to be 100% accurate but are included to help the reader visualize the buildings.

This is the typical floor plan

These sketches are for the first floor of each building.
 Buildings A-F all have 2 stories.
